

The TenStep Project Management Process is designed to provide the information you need to be a successful Project Manager, including a step-by-step approach, starting with the basics and getting as sophisticated as you need for your particular project. TenStep is a flexible and scalable methodology for managing projects of all sizes. The basic philosophy is “large methodology for large projects, small methodology for small projects™”. The product contains the overall processes, techniques, best practices, templates, deliverables, Workplan activities and examples you need to be successful in your projects today.

TenStep is comprised of the following ten steps – the first two for definition and planning, and the next eight for managing and controlling the work:

For organization fully aligned to PMI we can offer also the TenStep PB (PMBOK Framework).
